ARE YOU AWARE?

O.S.H.A. (1910.178) requires that all employees who operate powered lift trucks must be officially trained.

O.S.H.A. (1910.178) can impose a \$12,000.00 fine for each untrained operator.

TRAINED OPERATORS...

What our students have had to say about our training...

"The forklift training class was very educational. The instructor is very knowledgeable. She teaches her class very well, and ensures everyone understands how to safely operate a forklift. I would highly recommend this training course to anyone who operates a forklift." Robin L.

"We liked the way you presented things clearly and in an easy to understand manner. The training aids were excellent and thought provoking." Brian S.

"I found the class to be exceptionally informative and the instructors to be 'top notch' in their knowledge, ability to educate students in detail, and sincere interest that everyone understood clearly." Joe R.

"The class was relaxed and fun! I like the visual aids and thought you used the models very well when discussing the tipover factor. I like that you gave the background of OSHA." Brian H.

**Are O.S.H.A. compliant
Create a Safer Workplace
Work more Efficiently
Cause LESS Product Damage**
